

Cut red tape and work with more SME's

Exor looks to create efficiencies and far less work for buyers and their suppliers.

Our pre-qualification accreditation service, simplifies and de-risks processes by capturing, validating and monitoring information on both existing and new suppliers.

New and improved, Exor takes the hassle away and helps buyers:

- Save time spent vetting suppliers, assessing prequalification documents and maintaining approved lists
- Gain access to SME's who are pre-qualified and ready to work
- Manage the risks associated with a supply base effortlessly and effectively
- Satisfy audit requirements and establish a framework that helps comply with current legislation and regulations.

How does it work?

We offer you and your suppliers a choice of four accreditation levels.

All accreditation levels are underpinned by our rigorous questionnaire, aligned to government procurement standards including PAS 91.

The questionnaire covers:

- Financial
- Health and Safety
- Insurances
- Environmental
- Quality
- Diversity and Equality
- Certification and Licencing
- References

Exor is offered FREE to public sector organisations

Suppliers join, complete their questionnaire and for our Gold, Silver and Bronze accreditation levels, our in house auditors validate their responses.

Our new online portal provides you with access to your approved suppliers and our national database.

Furthermore our monitoring service keeps you updated with important changes, around the financial standing of your supply base.

What are the accreditation levels?

ExorRegister

Our basic level, ExorRegister enables suppliers to complete our PAS 91 questionnaire and self-certify. This does mean that their submission is not validated by one of our auditors and a financial assessment is not undertaken.

ExorRegister suppliers are recognised in our online portal with the symbol.

Exor Gold, Silver and Bronze

By selecting Gold, Silver or Bronze, supplier questionnaires and their supporting information, will be validated by our in house auditors, giving you confidence in their compliance.

As part of our validation service, we will undertake a financial assessment to establish a supplier's Experian Delphi score.

The score is used to establish a supplier's suggested safe trading limit and give confidence in their financial stability to undertake the works they are tendering for.

The following table provides you with information on the score a supplier will require for each level, along with the suggested safe trading limit.

	Exor Registered	Bronze	Silver	Gold
Safe Trading Limit - Per Job (£)	NA	5,000	25% of turnover capped at 25,000	25% of turnover
Safe Trading Limit - Per Annum (£)	NA	25,000	25% of turnover capped at 125,000	25% of turnover
Credit Reference Score	NA	1 or >	25 or >	45 or >

Select your own preferences

Our new online portal enables you as a buyer to select and update your own supplier preferences for:

- Regions
- Accreditation Level
- Work Categories

Preferences can be updated at any time by simply clicking on the Client Preferences tab within our accreditation portal.
